Arturo Jiménez de los Galanes

Staff Software Engineer | Software Architect | System Design | Technical Strategy | AI & LLM Engineering
Madrid, Community of Madrid, Spain

Summary

I'm a Software Architect with nearly 27 years of experience building software and helping engineering teams make better technical decisions. My work combines hands-on engineering with system design, technical strategy, and cross-team architecture. At Moeve, I help define reference architectures and technical standards used across 10+ initiatives and around 5 engineering teams. My recent work includes Node.js and React.js architectures, observability and software quality, as well as GenAI capabilities using LLMs and RAG. Based in Madrid, working across architecture, platform capabilities, and AI-enabled applications.

Experience

Movilok
20 years 8 months

Senior Software Architect
June 2022 - Present (4 years 5 months)
Greater Madrid Metropolitan Area

Selected client engagements:

Moeve — Mobility Architecture, reference architecture, shared libraries, cross-team standards.
- Defined reference architectures and reusable technical capabilities adopted across 10+ initiatives and ~5 engineering teams.
- Designed shared components for authentication, structured logging, observability, access control, and feature enablement.
- Guided internal teams and external vendors on architecture adoption, technical trade-offs, and integration decisions.
- Designed and contributed to reusable GenAI capabilities for mobile and web applications, including LLM integration and RAG-based conversational experiences.

- Improved application observability and traceability by defining integration libraries and dashboards with Datadog across mobile and web solutions.
- Strengthened software quality and delivery governance by integrating Kiuwan and SonarQube into CI pipelines and supporting application distribution workflows through Appcircle.
- Collaborated with Security, CI/CD, backend, and platform teams to drive consistent adoption of shared architecture capabilities, reducing duplication across applications and teams.
- Led architecture decisions involving offline capabilities, Firebase, AWS Amplify, and custom solutions based on complexity, cost, and maintainability.

Product Development Engineer
January 2015 - June 2022 (7 years 6 months)
Madrid

- Helped evolve the company from a project-based model toward reusable product capabilities and internal platforms.
- Led architecture and technical development of interactive digital signage solutions combining mobile devices and large-format displays.
- Worked across engineering, product, business, and client-facing functions to shape features and product direction.
- Presented solutions internationally and contributed to commercial and technical discussions with clients and partners.
- Contributed to a product recognized with 2nd place at the DSE Apex Awards in Las Vegas.

Mobile solutions Engineer
March 2006 - January 2015 (8 years 11 months)

- Designed and delivered mobile and web solutions for clients across multiple industries, including BBVA, Bankinter, Mutua Madrileña, Spanish Government and Moeve, combining hands-on engineering, technical leadership, project delivery, and stakeholder coordination.
- Contributed to BBVA mobile banking applications and applications for subsidiaries across multiple countries, supporting services used by BBVA mobile banking customers.
- Progressed from hands-on development into technical leadership, project ownership, and team coordination.
- Worked directly with clients to define requirements, technical approaches, and delivery plans.

Supported hiring, onboarding, and growth of engineering teams as the company scaled.

Soluziona Consulting. Unión Fenosa Group.

Software Engineer

March 2002 - March 2006 (4 years 1 month)

- Progressed from Junior Software Developer to Senior Software Developer, Team Leader, and Project Manager, taking on increasing technical, team, and delivery responsibilities.
- Led development teams and coordinated enterprise software initiatives, combining hands-on engineering with project planning and stakeholder communication.
- Contributed to Definete, a platform for generating personalized web portals dynamically adapted to different target devices, working primarily with Java/ J2EE technologies.

Education

Universidad de Castilla-La Mancha

Master's Degree, Computer Engineering · (2000 - 2008)

Universidad de Castilla-La Mancha

Bachelor of Science (B.Sc.) in Computer Systems Engineering, Computer Engineering · (1996 - 1999)
